

## Expereo certified as Advanced partner of Cisco's Cloud and Managed Services Program

**Amsterdam, Netherlands – 18th January 2021** – The world's leading provider of Global Internet, Cloud Access Optimization and managed SD-WAN solutions, Expereo, has been certified as an Advanced partner of Cisco's Cloud and Managed Services Program (CMSP). The certification further accredits Expereo as an expert Managed Service Provider (MSP) and attests the company's capabilities of supporting customers throughout the whole network implementation journey, from design transition to management of SD-WAN.

The CMSP certification recognizes Expereo as part of Cisco's world-wide Advanced partners for company's high level of competency and capabilities in Cisco SD-WAN solutions. The certification comes after a rigorous third-party audit, appointed by Cisco, which assessed Expereo's quality of services and its ability to provide them with reliability and security.

"We are very pleased to attain the CMSP certification as it proves that Expereo met the high standards it sets. We have the knowledge and experience necessary to understand a client's individual network needs, no matter the size or complexity – what are the hardware, licenses, and virtual edges required. Ultimately, it proves our commitment to our customers to provide them with leading technologies, in a highly compliant environment", explains Catherine Lee, Director of Service Development at Expereo. "Partners can trust Expereo to implement and manage their network thanks to our expertise"

Cisco's Cloud and Managed Services Program (CMSP) recognizes and rewards partners world-wide that offer cloud, managed, or virtual managed services based on Cisco technologies.

"We believe that the CMSP Advanced Partner certification further differentiates Expereo as a go-to Cisco partner and validates Expereo's outstanding capabilities as a managed SD-WAN provider", Catherine Lee adds.
