# Expereo Faster to the Future

Version 1.0

expereo  
faster to the future

Welcome to the intelligent internet

# The future is boundless

Connectivity is the lifeblood of global business. While other providers focus on keeping up, Expereo is ready to accelerate you into your digital future at astonishing speed.

Our unrivalled experience, built over almost 20 years, means we understand the internet better than anyone else. Our intuitive, AI-driven platform provides a dynamic, internet-centric architecture that connects your universe of people, places, and cloud securely, reliably and quickly, everywhere.

## Consolidated connectivity for total control

We know managing a global internet network is hard. That's why we give the scalable application and performance you need, with increased agility built in to enable you to move faster.

## The enterprise IP connectivity partner of choice

Expereo goes further for the enterprise. We cover all international and hard to serve markets and have provided over 40,000 WAN solutions for the global Fortune 500. With 5 global Customer Support Centers, experts fluent in over 40 languages, and smart hands on-call in 190 countries, no other provider comes close.

Welcome to the intelligent internet

# Complete visibility and control through a single pane of glass

## expereoOne

expereoOne is our intuitive customer experience layer that gives you total visibility and control of your entire global network estate through a single pane of glass. No more disjointed, inefficient views. You can see the underlay, overlay and performance right down to site level.

It provides ultimate network visibility with a view across all services provided via one platform: Expereo Internet, Expereo SD WAN and Expereo Enhanced Internet. All complemented by service status, invoicing, performance statistics. It's everything you need in one place – to accelerate you into the future and keep you there.

# Realize your future with Expereo's unrivalled global connectivity solutions

Global internet connectivity is our business. We've built trusted relationships with Internet providers in over 190 countries. And we can provide all the connectivity that enterprises need, including DIA and Broadband, Fixed Wireless Access (4G/5G), and Satellite. All with a single experience, SLA and global support model.

Welcome to the intelligent internet

## Expereo Global Internet

### Fast, secure global connectivity wherever you need it

Expereo deliver secure global connectivity, everywhere. Designing, delivering and running enterprise grade global internet WAN with the added flexibility, control and visibility you don't get with legacy infrastructures.

Gain single invoice and real-time cost control over all global services, and complete visibility of network performance from a single pane of glass through expereoOne.

## Expereo Fixed Wireless Access

### Continuity and speed to move faster

Expereo Fixed Wireless Access provides scalable, resilient connectivity wherever you need it, from a single provider.

Our all-in-one managed LTE/4G/5G broadband is the perfect alternative to a fixed line and its flexible data bundles enable cost-effective data sharing for lower cost and higher resilience.

Many enterprises rely on Fixed Wireless Access as a backup or failover service, using it for rapid deployment as a transitory solution until fixed access can be delivered.

## Expereo SD-WAN

### Cloud transformation for faster business growth

Reliable and predictable global application performance is the bedrock of any Cloud First/SaaS strategy – and any SD-WAN network is only as good as the network it runs over.

Expereo SD-WAN is our managed overlay service for global enterprises. By combining it with Expereo Internet we enable enterprise customers to meet business objectives fast with a single supplier.

Providing complete, secure visibility of your entire network estate right down to performance stats at site level.

## Enhanced Internet

### Put your cloud investments to faster work, everywhere

Expereo Enhanced Internet is the cloud application performance and user experience accelerating enterprises into the future around the world.

Currently available in 21 countries from 30 Expereo Hubs, our Enhanced Internet is powered by Expereo's unique AI proprietary technology and provided through our market unique internet routing optimization (BGP) engine.

Designed to constantly find and update your traffic to the best route in real-time, it means no more slow uploads or process delays. And it delivers improved performance, increased stability, guaranteed reliability, and faster-moving business.

# Why choose Expereo for faster, intelligent connectivity?

As your dedicated digital connectivity partner, we're with you today, tomorrow and beyond. Whatever the size and scale of your transformation, our experts listen to your needs, collaborate on designing the right solution, and seamlessly transition you to your digital future. Then we stay by your side with local support, everywhere you need it.

## We have the experience to prioritize your needs

Only Expereo has the relationships built over almost 20 years that enables us to design the solution for your business. We know the partners, the technology, the regulations and the pricing in countries where you need to be. We're way ahead of the competition and deliver a seamless customer experience.

## We design for you, not for us

When we design your global network, we only select providers on their ability to meet your specific requirements. Our phased approach includes proof of concept (POC) and test deployments so we can identify potential risks, to ensure no business disruption and a smooth, flawless transition to our solutions.

## We help you operate seamlessly, everywhere

Expereo's team design, plan and deliver your projects worldwide and on time. With powerful local partnerships, your team can optimize operations and perform seamlessly on your sites as if your own dedicated team were present.

## We provide 24/7 care and support

Expereo's comprehensive network monitoring service provides proactive round-the-clock vigilance. Regardless of location, our global support team will minimize downtime and ensure uninterrupted business operations by quickly identifying and resolving potential disruptions.

## The intelligent internet

Trust Expereo to put the intelligence in your internet. Everything we do makes the complex simple. Our unique relationships with global internet providers mean faster quoting, ordering, and support on the ground in your time zone and language. expereoOne gives you total visibility and control of your entire network, overlay and underlay down to site level. And our AI enabled Enhanced Internet solution provides real-time dynamic routing for the reliable, predictable network your business needs, everywhere.

Take your network to the future with Expereo's  
world-leading IP connectivity solutions
