ALWAYS-ON CONNECTIVITY

Remove network complexity and grow resilience
with managed LEO satellite connectivity

Build resilience, seamless performance, and always-on connectivity

Designing a connectivity strategy with resilience at its core is complex. With potentially hundreds of sites in multiple global locations and with varying infrastructure availability, what performs well for one site may cause your business headaches in another.

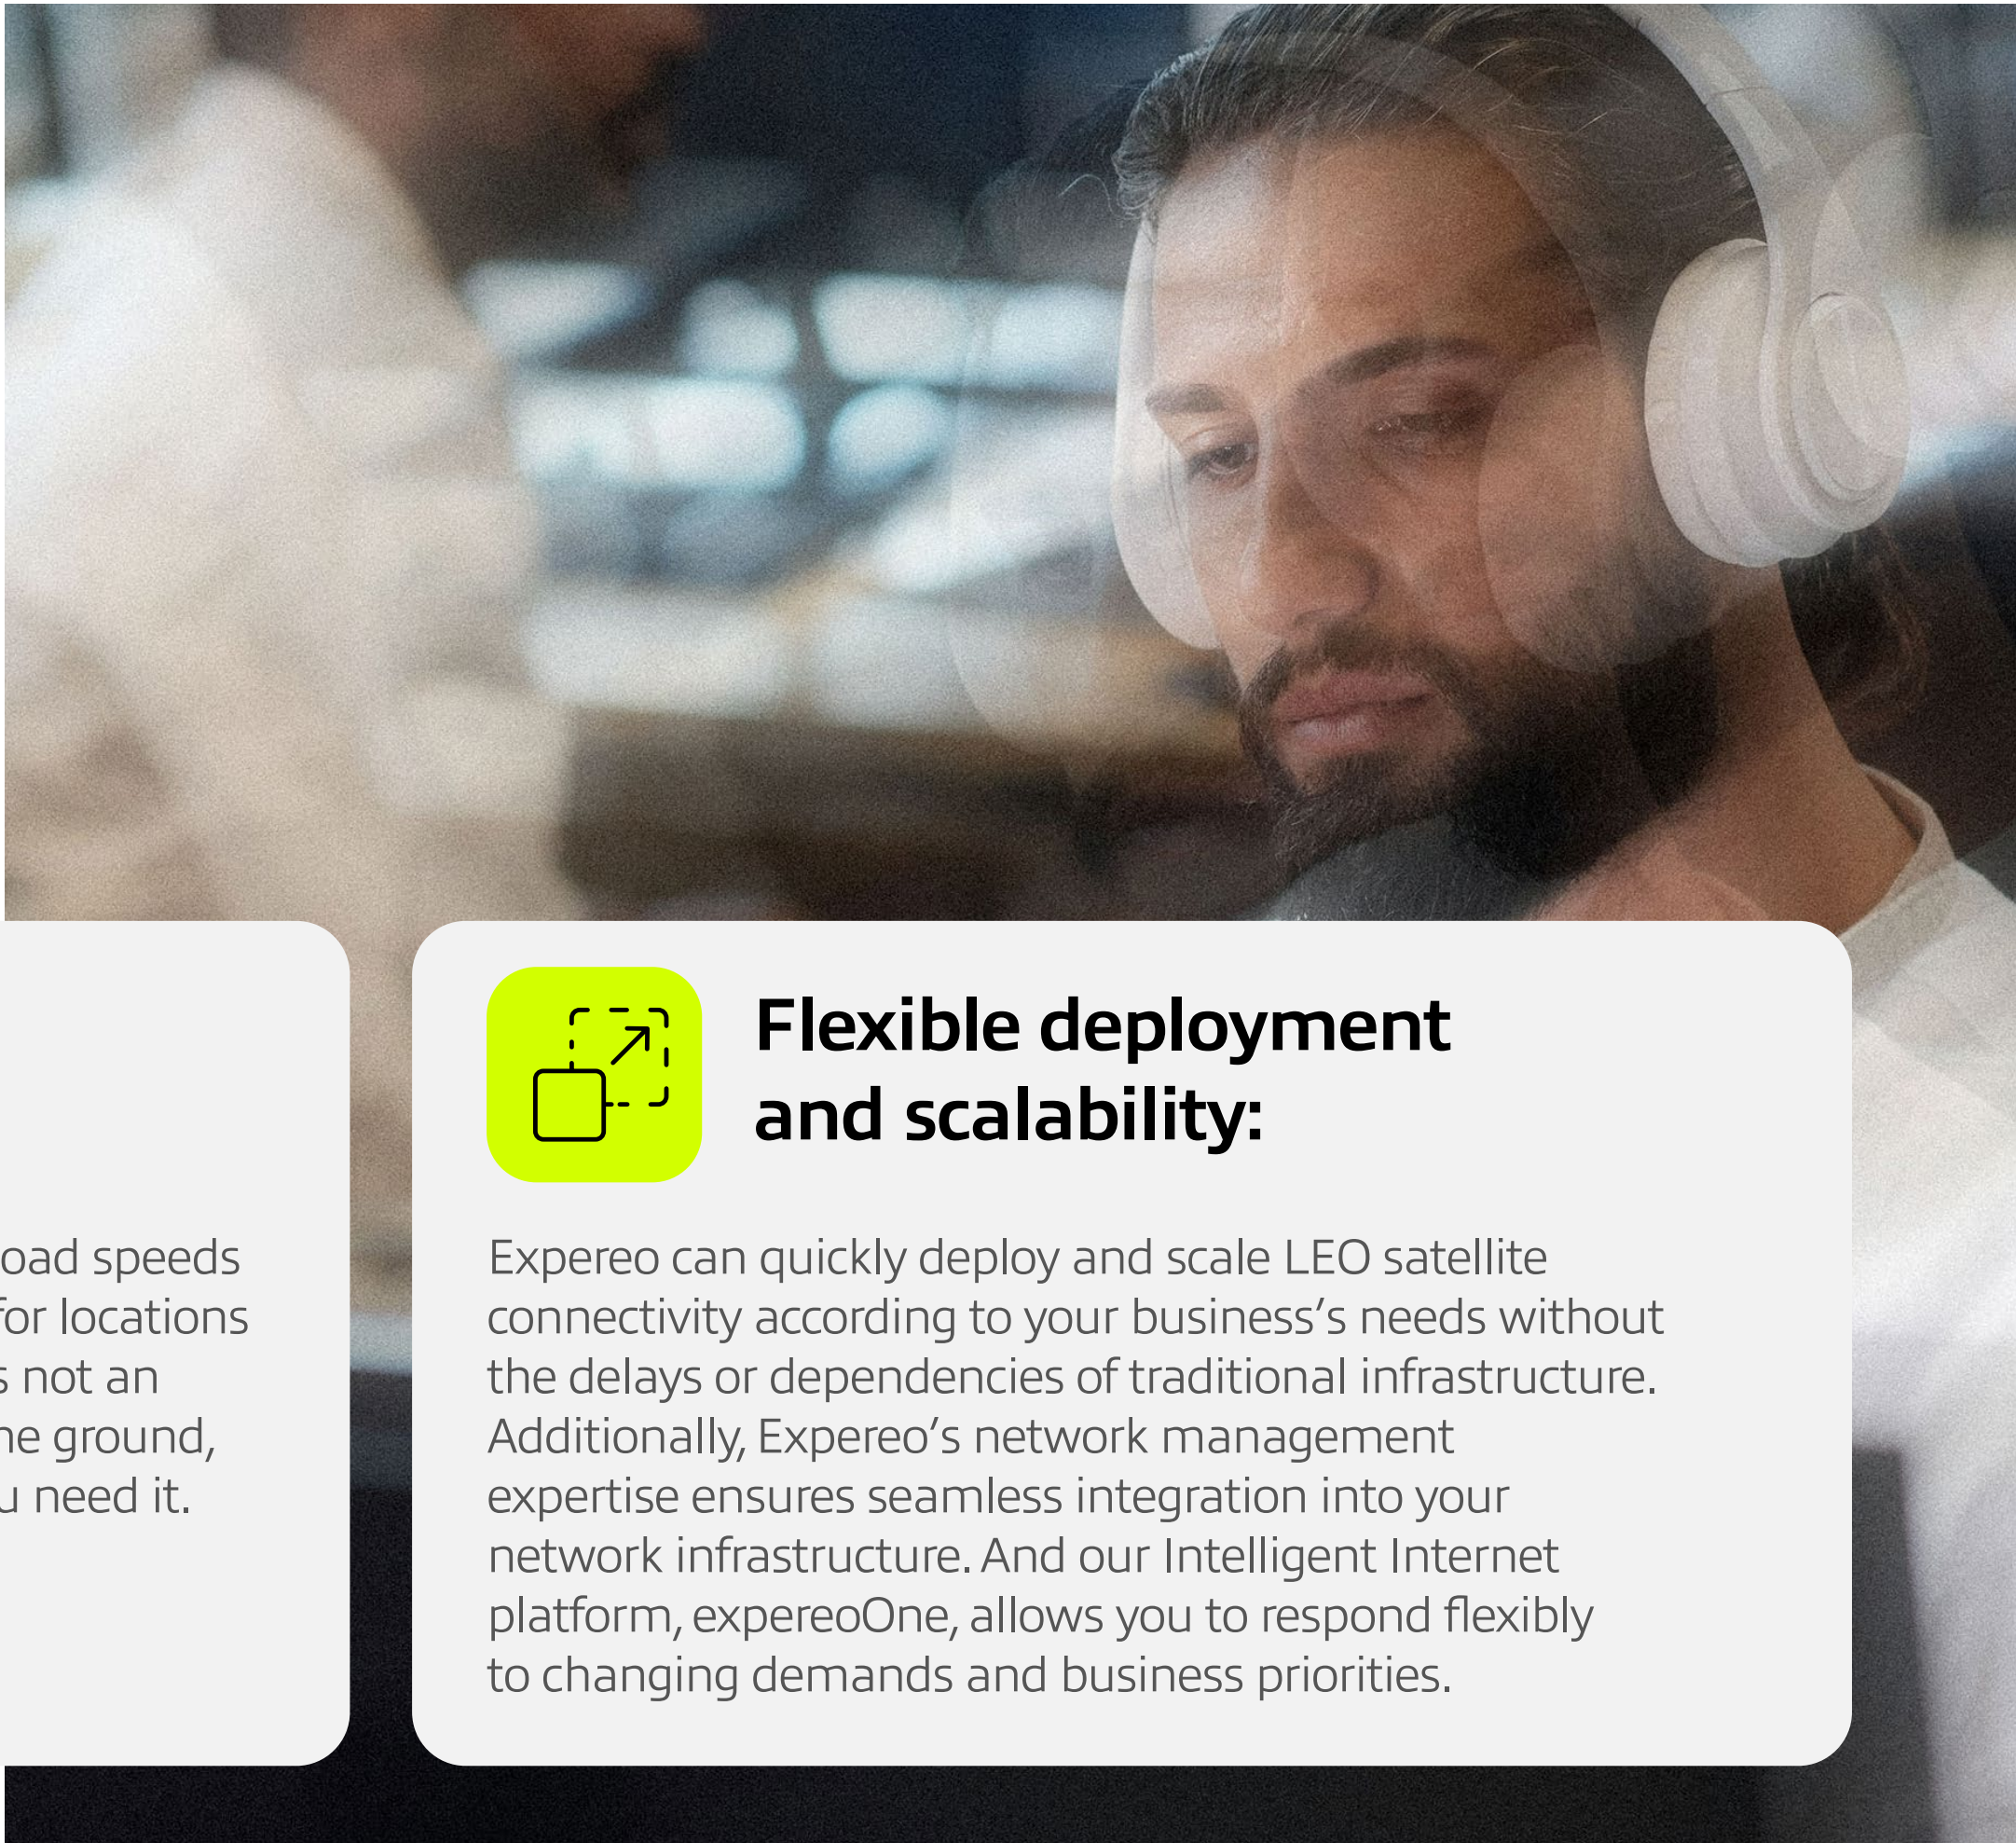

That's why you need a connectivity strategy that can keep every single site, device, and user online and productive, in every eventuality. Everything from natural disasters, hardware failures, cyber attacks, and human error can have a significant impact on your business. But an agile, resilient and diverse network can make the difference.

With Expereo's Low Earth Orbit (LEO) satellite solutions integrated into your connectivity strategy, you can create an agile, resilient, high-speed, always-on network tailored to the specific needs of each site.

LEO is a different kind of connectivity that complements your existing connectivity options. It has been critical for enterprises already using it in ensuring teams stay productive, sites are connected, and business remains operational via reliable, high-speed internet.

Choose uninterrupted connectivity with Low Earth Orbit satellite solutions from Expereo

Building Expereo's LEO satellite connectivity solutions into your network strategy delivers near-global coverage to minimize outages and maximize productivity. With managed delivery in over 100 countries it gives your business:

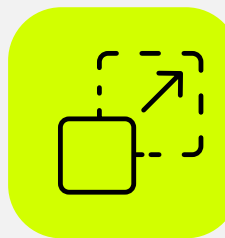

Network resilience:

With LEO satellite connectivity as a backup or primary connection, your business remains operational when faced with network disruptions due to physical infrastructure failures, fiber cuts, or regional outages. You gain an independent, technology-diverse layer that delivers consistent performance without relying on existing terrestrial networks.

The ability to connect at speed, anywhere:

With download speeds of 40–220 Mbps, and upload speeds of 8–25 Mbps, LEO satellite connectivity is ideal for locations where traditional fixed line or mobile coverage is not an option or is too slow. With our local experts on the ground, we ensure delivery and installation wherever you need it.

Flexible deployment and scalability:

Expereo can quickly deploy and scale LEO satellite connectivity according to your business's needs without the delays or dependencies of traditional infrastructure. Additionally, Expereo's network management expertise ensures seamless integration into your network infrastructure. And our Intelligent Internet platform, expereoOne, allows you to respond flexibly to changing demands and business priorities.

expereoOne

The platform that gives you visibility and control

With expereoOne you have complete visibility of your entire network and LEO service down to individual site level. From tracking delivery to understanding any service disruption, automated incident response tickets help you keep your business connected in the case of an incident.

With analytics and accurate visualization through a single pane of glass, you can identify any gaps, then choose and deploy the solutions you need to connect and grow your business.

expereoOne also gives you an accurate inventory of your orders, deliveries, site details, incidents, tickets, and invoices. So you can keep track of your costs as well as your services to make decisions based on powerful insights about performance.

Your only networking partner for complete connectivity

Expereo's managed-Network-as-a-Service, ensures every part of your business has the right connectivity and resiliency to meet its goals everywhere.

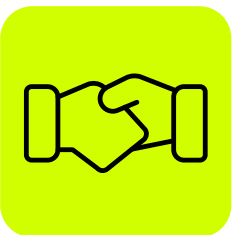

You will have a single point of contact with a team of trusted advisors to deliver the perfect solution for your business. This is our commitment to serving you personally, with the right people and the right technology.

When you integrate Expereo's LEO solutions into your connectivity strategy, you will create an agile, resilient, high-speed, always-on network tailored to the specific needs of each site. You will also have complete visibility and control of every one of those sites through expereoOne.

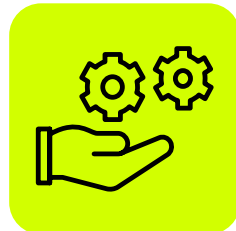

Here's what sets us apart:

20+ years' experience: At Expereo, we've been working solely on developing effective internet connectivity for over 20 years and we're proud to say that 60% of Fortune 500 companies use us for their connectivity needs today. We have a broad portfolio with world-class data and intelligence that can deliver a complete connectivity solution with Global Internet, Low Earth Orbit, SD-WAN, SASE, Enhanced Internet and Fixed Wireless Access solutions.

Consultation service: As part of our LEO satellite connectivity solutions, experts will review your network to understand your needs and advise you on the best network design for your business.

A truly managed service: We handle everything from network design, site surveys and setup recommendations to hardware provisioning, installation, and business priority data packages, network management and optimization. With one point of contact to ensure a seamless customer experience.

Global, local support: We have 24/7 support centers and people on the ground all over the world to help you. Their in-depth reach and understanding of connectivity challenges that other local enterprises have encountered best places them to help you overcome them.

LEO FROM EXPEREO: BETTER CONNECTING YOUR FUTURE

Expereo’s managed LEO solutions offer enterprise-grade design, implementation and support; all integrated into our Connect portfolio of services. Using Starlink’s cutting-edge LEO satellite technology, a dedicated public IP address, and full visibility in expereoOne, you gain the agility, resilience, reliability and performance you require to keep business running efficiently everywhere you need it.

When you integrate Expereo’s LEO solution into your connectivity strategy you can look forward to seamless, secure, and scalable global satellite connectivity that eliminates vulnerabilities, maximizes performance, and helps propel your business into the future.
