EXPEREO: YOUR PARTNER FOR RELIABLE, SCALABLE GLOBAL CONNECTIVITY

expereo
faster to the future

Operating a business today means relying on one of its most critical yet complex assets: connectivity.

Managing legacy networks across multiple providers, transitioning from MPLS to internet-based models (including LEO satellite and Fixed Wireless Access), and operating in unfamiliar markets can overwhelm even the most experienced teams.

The challenge goes beyond technology; it's also about complex contracts, pricing structures, and ensuring diverse, reliable site connectivity.

With so many moving parts, unplanned downtime is almost inevitable. And without the right partner to simplify and manage this complexity, businesses are held back – not just by outages, but by a network that lacks the speed, flexibility, and agility to keep up.

Expereo provides the expertise to build and operate a future-ready network – one that accelerates deployment, improves performance, and keeps your business connected and resilient in a rapidly evolving digital world.

CHOOSE YOUR CHALLENGE

Outdated Infrastructure

Legacy networks cannot keep pace with digital transformation demands, from AI to cloud apps. They limit agility, performance, and innovation potential.

Jump to →

Complexity & Cost Management

Managing multiple local providers and contracts globally breeds operational headaches, inflated costs, and fragmented visibility - making secure, consistent connectivity hard to achieve.

Jump to →

Downtime Risk

Unplanned outages disrupt mission-critical processes. Without resilient, multi-layered failover strategies, enterprises risk costly downtime and slow recovery, threatening productivity and revenue.

Outdated Infrastructure

BEFORE EXPEREO

Legacy networks limit technology potential and app performance.

James, Global Network Manager, faces constant challenges as legacy MPLS architectures, designed for pre-cloud era struggle to support modern cloud applications and AI workloads. The result: latency, bandwidth constraints, and reduced agility.

Meanwhile, Chief Digital Officer Priya worries the outdated network foundation slows digital transformation, limiting business agility and innovation at critical cloud and edge integration points.

Their enterprise risks falling behind in a fast-paced, app-driven world.

AFTER EXPEREO

Expereo unlocks access to AI and cloud innovation.

James now leads a modern, agile global network managed by Expereo, enabling him to optimize application performance with prioritized, consistent, and predictable traffic routing over the best-performing paths across the internet using **Enhanced Internet solutions**.

Priya gains confidence as real-time traffic insight and scalable connectivity accelerate digital initiatives, allowing the business to maximize its technology investments from cloud to edge.

Complexity & Cost Management

BEFORE EXPEREO

Operational and financial chaos draining resources and cost.

Mark, Procurement Manager, is overwhelmed by scattered invoices and a labyrinth of contracts, lacking clear spend visibility. Meanwhile on the ground, Elena, our Network Engineer, is juggling dozens of local ISPs with inconsistent SLAs and fragmented support, wasting time chasing issues.

AFTER EXPEREO

Expereo gives you full visibility and control, transforming complexity into insight.

With Expereo, Mark logs into **expereoOne** to see all invoices by site in one place, gaining clear visibility and control over costs and service levels.

This transparency enables easier intercompany billing and operational decision-making. Elena works seamlessly with Expereo as a single partner providing global, consistent connectivity and 24/7 proactive support so they can focus on growing the business confidently.

Downtime Risk

Business is exposed with downtime disrupting operations, frustrating customers, and threatening revenue.

Carlos, Network Operations Lead, spends too much time reacting to outages, with network continuity vulnerable across all site types - from offices to plants to remote locations. The lack of a coherent, location-specific connectivity and failover strategy leaves critical operations exposed.

AFTER EXPEREO

Ensure business continuity everywhere with a tailored, resilient connectivity strategy.

Carlos now relies on a custom solution of connectivity options – including **LEO satellite service** and **Fixed Wireless Access** – all managed by Expereo as part of an overall connectivity strategy, tailored site-by-site. This approach to network continuity minimizes downtime risk and protects operations across global locations.

Expereo's comprehensive portfolio and proactive management ensures businesses stay online and competitive.

LET'S EXPLORE YOUR NETWORK FUTURE

Unlock strategic agility for your business by partnering with the experts in enterprise connectivity.

From transforming legacy networks to delivering a fully managed, global IP connectivity solution, Expereo provides a network that's agile, resilient, and visible through **expereoOne** – a single pane of glass platform giving you complete insight into the health and performance of your entire global infrastructure.

60%

of Fortune 100 companies trust Expereo, and with over 20 years' experience, Expereo helps transform connectivity into competitive advantages.
